NOTICE TO ADVERTISERS.

The Weekly Issue of the **BRITISH MEDICAL JOURNAL** amounts now to 11,250 Copies, and will be increased again shortly.

An Edition is also printed on Thin Paper, to meet the demands of a large and increasing Foreign circulation.

MEDICAL BENEFIT SOCIETY.

Upwards of 750 Members have returned the form enclosed in the Journal of the 9th inst., approving the proposal for a Medical Benefit Society, which shall provide payment in sickness, and a superannuation allowance in old age, to members of the medical profession. Other members approving this project who have not yet returned the forms are particularly requested to do so without any delay. To any members who have mislaid their forms further copies can be furnished.

In July next, 8vo, 100 to 150 pages.

Price, to Members of the British Medical Association, 1s. 6d., to others, 2s.

The Collective Investigation Record.

This publication will form a medium of communication between those interested in the work of Collective Investigation; and will contain Reports, Memoranda, Enquiry Papers, Original Articles, etc., in a separate form, convenient for reference.

To ensure copies, orders, with remittance, should be forwarded, as early as possible, to the

GENERAL SECRETARY, 161A, Strand, London, W.C.

Now Ready, Third Edition, enlarged and chiefly rewritten, with Coloured Plates, price 1s. 6d.

Diseases of the Ear.

By **GEORGE P. FIELD, M.R.C.S.**, Aural Surgeon to St. Mary's Hospital and Lecturer on Aural Surgery in the Medical School.

"Very practical and helpful."—*Lancet*.
"Forms an excellent guide for the practitioner or the student."—*Brit. Med. Jour.*

"It is a practical treatise founded on vast clinical experience. The illustrations are excellent and helpful, the text is clear and concise, and the work as a whole is as complete and trustworthy as we could desire. We recommend it strongly to practitioners and students alike."—*Medical Press and Circular*.

"It contains a novel feature, a number of plates are given on thick cardboard, the spot where the membrana tympani ought to be seen is perforated, and a coloured representation of the drum is pasted on behind. If the membrana be looked at through a speculum, a more correct idea than any heretofore given, will be the result."—*Medical Times and Gazette*.

"One of the most useful and practical guides to the treatment of diseases of the ear that have ever been published in this country."—*Lon. Med. Record*.

"Most suitable as a text-book for the student, for the practitioner, or aural surgeon."—*Edin. Med. Jour.*
