"The author . . . has written as a general practitioner for general practitioners . . . it has been his object not to advocate any single method of treatment. The chapters on the principles and details of such [instrumental] treatment, which occupy a considerable portion of this book, will be found useful and instructive."—*British Medical Journal*.

"The author . . . is to be congratulated upon the success which has attended his efforts to produce what will prove to be a really useful and reliable manual for the busy practitioner . . . the book is one which we can strongly recommend to our readers."—*The Journal of Bacteriology and Climatology*.

"This . . . treatise . . . is written by a general practitioner for general practitioners. . . . It is illustrated by numerous very excellent illustrations . . . in most part . . . reproduced from original photographs. . . . This last chapter, 'A System of Medical Exercises,' is most interesting and useful."—*West London Med. Jour.*
