

BRITISH MEDICAL JOURNAL

APRIL 11 1942

TABLE OF CONTENTS

ADDRESSES AND PAPERS	
Changes in Haemoglobin Concentration and Plasma Specific Gravity following Plasma Transfusions. JOHN BEATTIE, M.D., D.Sc.	459
Changes in Blood Volume following Transfusions of Serum or Plasma and Fate of Injected Protein. GRAHAM W. HAYWARD, M.D., M.R.C.P., and ARTHUR JORDAN, M.B., D.Sc.	462
The Low Nail. H. A. BRITAIN, M.Ch., F.R.C.S.	463
A New Method of Controlling the Head Louse. J. R. BUSVINE and Prof. P. A. BUXTON, M.R.C.S.	464
The Sterilization of Paraffin Surgical Dressings. R. MAXWELL SAVAGE, F.I.C.	472

MEDICAL MEMORANDA	
Epidemic Catarrhal Jaundice. C. GRANT NICOL, M.B., D.P.H.	466

GENERAL ARTICLES AND NEWS	
The Emergency Surgical Station. K. VERNON BAILEY, M.D., M.R.C.P.	474
Economy in Use of Bactericides	475
THE SERVICES	483
MEDICAL NEWS	484
Epidemiology Section	485

LEADING ARTICLES	
Oxygen Therapy in Surgery	468
Arthrodesis	469

ANNOTATIONS	
The Present Choice of Disinfectants	469
Insulin for Neurodermatitis	470
Second Attacks of Poliomyelitis	470
Dickens as Clinical Observer	471
Committee on Medical Schools	471
Changes of Address	471

REVIEWS	
Muir's Pathology	466
Abdominal Surgery	466
The Psychosomatic Conception of Disease	467
Ophthalmology	467

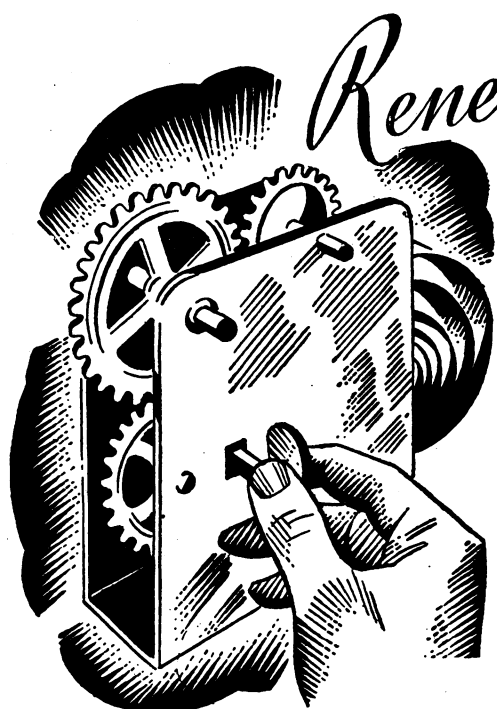

REPORTS OF SOCIETIES	
NUTRITION SOCIETY	476
FACULTY OF RADIOLOGISTS	477

OBITUARY	
A. C. Roberts, M.R.C.S.—A. C. Devereux, F.R.C.S.—Wilfrid Kingdon, M.B.—H. E. Rowell, M.D.—F. S. Batchelor, F.R.C.S.	482

SUPPLEMENT	
B.M.A. at Work	57
MEDICAL WAR RELIEF FUND	59
CORRESPONDENCE	57
H.M. SERVICES APPOINTMENTS	60

CORRESPONDENCE	
Detection and Treatment of Tuberculosis. Sir FREDERICK MENZIES, M.D.	477
Discovery of Symptomless Pulmonary Tuberculosis. GEORGE JESSEL, M.D.	477
Declining Population. W. G. WILLOUGHBY, M.D.	478
Diphtheria Immunization with A.P.T. J. T. CHALMERS KEDDIE, M.B.	478
Post-war Planning and Winning the War. R. WATSON-JONES, F.R.C.S.	478
The Teaching of Anatomy. J. M. YOFFEY, F.R.C.S.; J. PRICE WILLIAMS, M.D.	479
Loss of Vitamin C in Cooking. S. W. SWINDELLS, M.B.	479
Accessory Oxygen Supply. JAMES DEENY, M.D.	480
Spinal Anaesthesia. W. W. MUSHIN, M.B.	480
Haemoglobin of Pregnant Women. W. KERR HENDERSON, M.B.	480
Effect of Haemorrhage on Red Cell Size and Distribution. H. J. BRENNAN, M.D.	481
Treatment of Fractured Ribs. W. SAYLE CREER, F.R.C.S.	481
Electrical Factors and Glaucoma. W. N. ABBOTT, M.B.	482

LETTERS AND ANSWERS	
Milk for Steel Workers—Income Tax—Fate of a Swallowed Prune—Dyspeptics and the "National" Loaf—Diagnosis of Whooping-cough—Benzedrine for Eustachian Tube and Middle Ear—Botany in the Curriculum—Dazzle from Car Lights	486

DRIVING FORCE

CARDOPHYLIN (*Theophylline-ethylenediamine*) promotes coronary dilatation, stimulates the respiratory centre, is a powerful diuretic, and has no toxic or cumulative effects. Its administration is indicated in the treatment of

**ARTERIO-SCLEROSIS, CARDIAC and BRONCHIAL ASTHMA,
ANGINA PECTORIS, CHEYNE-STOKES BREATHING,
OEDEMA, and allied conditions.**

Recent clinical investigations in Great Britain and in America have demonstrated that theophylline-ethylenediamine has a wide and diverse range of therapeutical application. This may, perhaps, be ascribed to the close relationship of the chemical structure of theophylline with that of the purine derivatives, which are known to play the most vital and fundamental rôles in metabolism and which may be the principal source of the dynamism which activates the life processes within the cells.

Cardophylin
(THEOPHYLLINE-ETHYLENEDIAMINE)

In tablets, ampoules and suppositories.
