WINSLOW, M.B. and M.L. Cantab.; M.R.C.P. Lond.; D.C.L. Oxon. With Preface by FORBES WINSLOW, M.D., D.C.L. Oxon.

"The busy practitioner will find pointed out in this volume the rocks and dangerous quicksands to be avoided; in other words, he can easily ascertain what he may and may not do, in reference to the confinement and detention of persons alleged to be mentally unsound, and fit subjects for surveillance."—*Extract from Preface.*

"We may safely say that those who follow the instructions given will not have to plead ignorance of the law as an excuse for its violation, for they will find in it full and precise directions as to all they need to know respecting the care of the insane, either in public institutions or in private houses, while a very copious index will enable them at any moment to turn to the point they may desire to refer to."—*Med. Press & Circular.*

"We anticipate that it will become the *code memento* of practitioners in lunacy."—*Lancet.*

"It is the first attempt of the kind to embody in a text-book important facts pertaining to insanity in its medico-legal aspect. As a faithful guide in all matters connected with the treatment of lunatics, private and public, it is most invaluable. This work will be as essential to the physician and lawyer as the 'Medical Directory' and 'Law List' are to members of those professions. It should be found in the library of every barrister and solicitor, as well as physicians and surgeons. It constitutes a complete *code memento* on the subject to which it relates. A clear exposition of the various Acts of Parliament connected with the confinement of persons alleged to be insane is given, and plain and easily understood instructions are laid down for the guidance of medical men when called upon to assist in placing under legal restraint persons alleged to be insane, until full to be at large, or to manage their property."—*John Bull.*
