GEORGE P. FIELD, M.R.C.S., Aural Surgeon to St. Mary's Hospital and Lecturer on Aural Surgery in the Medical School.

“It contains a novel feature, a number of plates are given on thick cardboard, the spot where the membrana tympani ought to be seen, is perforated and a coloured representation of the drum is pasted on behind. If the membrana be looked at through a speculum, a more correct idea than any heretofore given, will be the result. The plan is novel and the book is good.”—*Medical Times and Gazette*.

“Very practical and helpful.”—*Lancet*.

“The practitioner will not often take up a book on a special subject, which will afford him more pleasure and satisfaction.”—*Medical Press and Circular*.

“Plain, shrewd common sense.”—*Brit. Med. Jour.*
