NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION,

7, ST. MARTIN'S PLACE, TRAFALGAR SQUARE, LONDON.

Established May 1844.

Trustees.

Lieutenant-Colonel the Right Honourable LORD GEORGE PAGET, M.P.
 Rev. JOSEPH PRENDERGAST, D.D. (Cantab.), Lewisham.
 GEORGE STONE, Esq., Banker, Lombard-street.
 MATTHEW HUTTON CHAYTOR, Esq., Reigate.

INVESTMENT OF CAPITAL AND SAVINGS.

THE Investment of Money with this Association secures equal advantages to the surplus Capital of the affluent, and the provident Savings of the industrial classes of the community, and affords an opportunity for realising the highest rate of interest yielded by first-class securities, in which alone the money is employed.

Moneys deposited with the Association, for Investment, are exempt from liabilities on account of life contingencies, as well as the expenses of management, which are borne by the Life Department, in consideration of the business brought to it by Investment transactions; therefore Depositors enjoy the entire profits yielded by their capital, *free from deduction of any kind—an advantage which no other Institution, either public or private, holds forth, or can afford, to its members.*

The rate of Interest upon the Investment Stock hitherto has been generally *five per cent. per annum*; and this rate will continue to be paid so long as the Assurance Department finds the same safe and profitable employment for money. Interest payable half-yearly, in January and July.

CAPITAL STOCK, £100,000.

The Capital Stock is altogether distinct and separate from the *Depositors' Stock in the Investment Department*. It constitutes, with the Premium Fund, a guarantee for the engagements of the Association, and has been provided in order to render the security of the Assured complete.

LIFE DEPARTMENT.

This Department embraces a comprehensive and well-regulated system of Life Assurance, with many valuable and important improvements.

Amongst the varied and extensive Tables computed expressly for this Institution, those for Reversionary and Deferred Annuities, Endowments for Children, and Educational purposes, are particularly deserving of attention.

Tables will be found, by which credit is given for half the amount of the Annual Premium, for periods of Five and Seven Years; also, a novel Table for securing Loans or Debts, the rate of Premium by which will protect the interest of the Policy-holder from all contingencies, and allow the Life Assured to proceed to, and reside in, any part of the world, without special license from the Board of Management.

Full information and Prospectuses may be obtained, on application at the Head Office of the Association, or to the respective Agents throughout the United Kingdom.

PETER MORRISON, *Managing Director.*

N.B.—Applications for Agencies may be made to the Managing Director.
